

Product Data Sheet

PT Maxnitron Booster Benzene

Benzene Fuel Conditioner

PT Maxnitron Booster Benzene is a benzene fuel booster that helps clean dirt and carbon deposits from fuel injectors, intake valves, and combustion chambers. It enhances the performance of gasoline engines, allowing them to operate at their maximum efficiency.

Customer Benefits

- Cleans and removes dirt and deposits from the engine, intake valves, and fuel injectors.
- Increases the octane rating of gasoline, promoting more complete fuel combustion.
- Provides excellent protection against corrosion.
- Keeps the engine clean and well-maintained.
- Compatible with gasoline, as well as gasohol fuels E10, E20, and E85.

Customer Benefits

- Suitable for cars and motorcycles that use gasoline as fuel.
- Can be mixed with gasoline at a ratio of 1 can per 60–70 liters of fuel.
- Avoid inhaling vapors and direct contact; wash immediately if contact occurs, and dispose of the container in an appropriate location.
- Shake well before use and open the can slowly to prevent pressure buildup inside.
