

Product Data Sheet

PT Maxnitron Booster Diesel

Diesel Fuel Conditioner

PT Maxnitron Booster Diesel is a diesel fuel booster formulated to remove dirt deposits and soot buildup from fuel injectors, intake valves, and the combustion chamber. It enhances the overall efficiency of diesel engines, allowing the engine to operate at maximum power and peak performance.

Customer Benefits

- Helps clean and remove accumulated deposits inside the engine, intake valves, and injectors
- Restores optimal injector performance, resulting in improved fuel economy
- Enhances engine power and acceleration
- Promotes more complete combustion, reducing exhaust emissions
- Provides excellent corrosion protection
- Keeps the engine clean at all times and helps extend overall engine life
- Compatible with diesel fuel and biodiesel B7, B10, and B20

Customer Benefits

- Suitable for passenger cars, pickup trucks, and trucks that use diesel fuel
- Can be mixed with diesel fuel at a ratio of 1 can per 60–70 liters of diesel
- Avoid inhalation of vapors and direct contact; wash immediately if contact occurs and dispose of the container properly
- Shake well before use and open the can slowly to release internal pressure
