

Product Data Sheet

PT Maxnitron Booster Moto

Benzene Fuel Conditioner For Motorcycle

PT Maxnitron Booster Moto is a gasoline fuel additive designed for motorcycles. It helps clean dirt and carbon deposits from injectors, intake valves, and combustion chambers, while enhancing engine performance so that the motorcycle engine operates at its full potential.

Customer Benefits

- Can be used with both 4-stroke and 2-stroke engines.
- Helps clean and remove dirt and carbon deposits from the engine, intake valves, and fuel injectors.
- Increases the octane rating of gasoline, ensuring more complete fuel combustion.
- Provides excellent protection against corrosion.
- Keeps the engine clean and well-maintained.
- Compatible with gasoline and gasohol fuels as recommended by the vehicle manual.

Customer Benefits

- Suitable for motorcycles that use gasoline or gasohol as fuel.
- Can be mixed into gasoline or gasohol at a ratio of 1 bottle per 5–6 liters of fuel.
- Avoid inhaling fumes or direct contact; rinse immediately if contact occurs and dispose of the container properly.
- Shake well before use and open the bottle slowly to prevent internal pressure buildup.
